

AMITEYE FAVOUR OFEORITSE

SOFTWARE ENGINEER

Lagos, Nigeria | ofeoritseamiteye03@gmail | github: [ofeoritse-amiteye](#) | +234 912 207 2401

SUMMARY

Software engineer with hands-on experience building web and mobile applications using Next.js, React Native, React, Django, and Firebase. Skilled across full-stack development with a track record of delivering user-facing features, optimising performance, and deploying scalable systems. Fast learner and problem-solver who thrives in dynamic environments.

EXPERIENCE

ICT Intern

Mar 2023 – Aug 2023

Heritage Energy Operational Services Ltd (HEOSL) · Warri, Delta State

- Built a Django-based web application for computer-based testing, streamlining the company's internship recruitment process and reducing manual effort.
- Assigned to develop a hospital management system using two parallel approaches: HTML/CSS/PHP and Django/Python gaining comparative full-stack experience.
- Delivered IT support across the organisation, resolving hardware issues and minimising operational downtime.
- Completed field operations training alongside operatives, gaining insight into oil and gas workflows.

Software Engineer (Freelance)

Jan 2025 – July 2025

Self-Employed · Remote

- Designed, developed and deployed full-stack web and mobile applications for multiple clients across e-commerce, logistics, and education sectors.
- Built a content creator marketplace platform connecting brands with verified influencers, including campaign management, application workflows, secure messaging, and performance tracking.
- Developed a fantasy sports application with real-time match scoring, head-to-head matchmaking, regional rankings, and continental leaderboards.
- Provided end-to-end IT support, diagnosing hardware and system issues and maintaining application reliability .

IT support/ System Engineer

July 2025 – Present

TopTech Engineering Ltd · Lagos

- Provided end-to-end technical support for networking and system-related issues, ensuring minimal downtime and optimal performance across operations.
- Designed and developed an internal ticketing/support system to streamline issue reporting, tracking, and resolution workflows.
- Diagnosed and resolved hardware, software, and connectivity issues across multiple devices and environments.
- Operated and maintained specialized equipment, including a degaussing machine, ensuring proper data sanitization and compliance with hardware handling standards

PROJECTS

Multi-Purpose Student Assistant App

2023 – 2024

Stack: *React Native (Expo), Firebase*

- Developed a mobile app delivering 10+ features for campus life including class timetables, campus navigation, meal planning, academic resources, and smart notifications.
- Implemented real-time data sync via Firebase, improving user task efficiency by 40% and enabling full offline access to essential content.
- Features: Campus Map, Timetable Management, Smart Reminders, Cafeteria Schedules, Task Manager, Secure Auth & Profile Management.

Inventory Management System

2023 – 2024

Stack: *Django, Python, MySQL*

- Built a comprehensive inventory system with real-time stock tracking, expiration alerts, automated email notifications, sales recording, and analytics dashboards.
- Improved inventory accuracy and reduced manual reporting overhead through automated alerts and reporting features.

Fantasy Sports Platform

2024 – 2025

Stack: *React, Node.js, Firebase*

- Developed a dynamic fantasy sports app supporting daily lineup management, real-time match scoring, head-to-head matchmaking, and automated lineup validation.
- Implemented regional and continental leaderboards with a luck-based slot allocation system for global competition entry.

Content Creator Marketplace

2025

Stack: *React, Node.js, MongoDB, Firebase, Web-socket, Prisma, Tailwindcss*

- Built a scalable marketplace platform connecting brands with verified content creators for influencer marketing campaigns.
- Delivered features including creator discovery & verification, campaign creation, application/approval workflows, secure messaging, and payment readiness infrastructure.

EDUCATION

BSc Management Information Systems

Jan 2021 – Jul 2024

Covenant University · Ogun State, Nigeria

- Relevant coursework: Database Management, Software Development (Python, Java, C, C#), Data Analytics, Business Process Management, IT Strategy & Governance, Project Management.

Senior Secondary School Certificate (SSCE)

Sep 2017 – Mar 2019

Willen Secondary School · Delta State, Nigeria
